

Bond University Medical Program

Emergency Medicine Placement Student/Clinician Guide

Emergency Placement

The Emergency Medicine Placement combines elements of all subspecialties while focusing on:

- 1) Recognition and resuscitation of the acutely unwell patient
- 2) Assessment and management of the undifferentiated patient
- 3) Effective communication and facilitation of patient care

During this placement you will have shifts on a roster basis that will cover morning, afternoon, evening, nights, and weekend work.

Placement Specific Learning Outcomes

	Emergency Medicine Specific Learning Outcomes	Link to year LO's (See appendix 1)
ED1	Demonstrate knowledge, skills and attitudes required to assess and manage common adult and paediatric emergencies.	1,2,4,5,7
ED2	Explain the role of Emergency Departments and Emergency Medicine as a speciality.	14,15
ED3	Demonstrate, where possible, the practice of key emergency procedural skills such as cannulation, wound care, suturing and splinting as well as basic life support skills.	8
ED4	Demonstrate the development of professional skills such as clinical reasoning, critical analysis, teamwork and dealing with uncertainty when managing patients.	4,6,10,11,17,19
ED5	Demonstrate the development of attitudes, knowledge, and skills for competent care of injured and /or infirmed individuals of all ages, socioeconomic, ethnic backgrounds for disease prevention, recognition of disease presentation and promotion of optimal health habits.	2,7,12,13,16
ED6	Develop skills such as clinical reasoning, critical analysis, teamwork, and dealing with uncertainty when managing patients.	6,7,10,19,21
ED7	Assist in critical illness and injury and resuscitation.	1,7,10
ED8	Demonstrate the ability to hand-over or refer a patient using the ISBAR framework and/or summarise a case presentation concisely, synthesise the key problems, formulate a diagnosis/differential and an initial management plan.	6,11,15

Core Topics

Symptom Based Approach	Examples
Acute Rashes and swelling □	Angioedema □ Urticaria □
Acute visual loss □	
Bleeding problem □	Epistaxis □ Haematemesis □ Haemoptysis □
Breathing problem □	Dyspnoea □ Wheezing □
Burns □	
Coma, alteration in conscious level □	
Disorientation, confusion □	
Fever □	
Headache □	
Hypothermia □	
The III Child □	 Child with fever □ Fitting child □ Limping □ Non accidental injury □ Respiratory emergency □
Injury □	 Abdomen □ Chest □ Head □ Long bones □ Maxillofacial □ Pelvis □ Spine □ Soft tissue □
Major trauma □	
Near drowning □	
Pain/Discomfort □	 Backache □ Constipation □ Joint □ Swollen/painful leg □ Urinary retention □
Painful Eye 🗆	
Seizure □	
Shock and Hypotension □	
Syncope, collapse □	
Undifferentiated □	Abdominal pain □ Chest pain □
Medical Conditions	
Child Health Emergencies □	The III child (see above in symptom-based approach table)

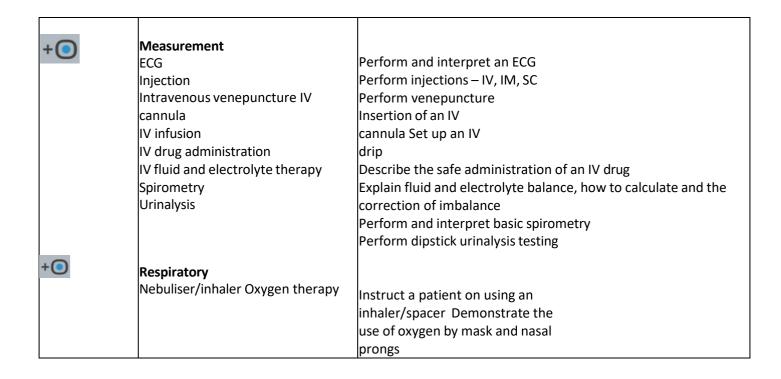

ENT □	 Dysphasia □
	Ear pain □
	 Foreign bodies □
	 Loss of hearing □
Medical Emergencies	• Acute coronary syndromes □
	Allergic reaction □
	Cardiac arrhythmias □
	 Diabetic ketosis □
	 Exacerbation of OCAD, asthma □
	Heart failure □
	Pancreatitis □
	Pulmonary embolus □
	 Subarachnoid haemorrhage □
	Stroke □
Mental Health Emergencies □	Psychotic patient □
	 Acute Behavioural Disturbance □
Ophthalmology	Blunt trauma to the eye □
	• Foreign bodies □
Orthopaedics	Dislocated joint □
•	Fractured bones □
	Nerve /tendon /muscle injury □
	Septic arthritis □
Surgical Emergencies	Differential diagnosis of the acute abdomen
	Ischemic limb □
Toxicology and Environmental Emergencies □	Common drug withdrawal states □
	Overdose of drugs
	Benzodiazepines □
	• Opiates □
	Paracetamol □
	• Salicylates □
	Serotonin □
	Tricyclics (TCA) □
	 Use of specific antidotes □ (Naloxone □, & N-
	acetylcysteine □)
	Environmental
	Electrical injuries □
	 Envenomation (snake □ and spider bites □)
	 Hypothermia □ and hyperthermia □
	Near drowning
	 Poisoning- carbon monoxide □
Trauma 🗆	Single injury □
	Multiple injuries □
	Abdominal organs □
	• Chest □
	• Facial □
	• Head □
	• Limbs □
	• Spine □

Women's Health Emergencies □	Bleeding in early and late pregnancy □
	Ectopic pregnancy □
	Eclampsia □
	Pelvic inflammatory disease □

ED Placement Procedural Skills

This Osler ePortfolio logo indicates there is a best practice module available in the Osler 'catalogue' for you to view as you wish to support your learning. Some of these procedures are part of the suite of those required for graduation. Some are to support the depth and breadth of your learning on clinical placement.

	Procedure	Students must be able to take/demonstrate
+•		Perform and interpret normal and common conditions on a 12 lead ECG Observe and describe plus demonstrated ability to perform: 1) 2 person CPR 2) Safe use of defibrillator 3) Placement of LMA 4) Effective use of BVM with adjuncts
+•	Arterial blood gas sampling	Observe and describe indications for taking an arterial blood gas sampling (if appropriate)
+•	Pleural effusion/pneumothorax	Perform and interpret a peak flow measurement *occasionally Perform and interpret a spirometry reading * very rare for ED Observe and describe indications for aspiration or drainage
+•	Diagnostic Blood culture Blood sugar Wound swab	Take blood for culture Estimate the blood sugar using a glucometer Take a swab from a wound
+0+0+0	sedation Assess and Interpret disorders of coagulation Catheterisations (Vascular or urinary) Describe X-ray findings of chest, abdomen and limbs Give an IMI (ADT booster) Identify and interpret acid-base disorders Identify and interpret glucose, sodium, potassium, and calcium disorders	1) Observe procedural sedation and analgesia 2) Observe regional analgesia (Biers/Fascia Illiaca block) 3) Observe and describe the indications and principles for inserting a chest drain
	Perform a ring block with administer local anaesthesia Use suction	Clean, dress, apply steristrips, glue or sling/tubigrip

Timetable and Contacts

Students are expected to be present on a daily basis during their placement. If students are unable to attend for any reason, they are required to advise the clinician, hospital co-ordinator (where available) and the Placements Team at Bond University: Medplacements@bond.edu.au

Clinical Supervision and Assessment

Students have a variety of workplace-based assessments (WBA) to successfully complete during this Clinical Placement. All WBA are completed in Osler ePortfolio, a cloud-based mobile assessment technology, giving students, supervisors and faculty immediate access to WBA feedback and evaluation. WBA are not only the students' richest source of personal feedback on performance but are also evidence of their clinical skills development and safety to practice.

At the end of each clinical placement, the Board of Examiners (BOE) will review all required WBA to decide whether the student has passed the Clinical Placement. If all WBA are not submitted by the due date, the BOE may not have sufficient evidence to make an Ungraded Pass decision and the student progression in the Medical Program may be delayed. Students can be failed for not meeting attendance requirements on Clinical Placement.

All WBA are to be submitted in Osler by 8 am Monday following the end of each Clinical Placement

In Clinical Placement 5, ITA can be completed in W6 due to the OSCE being held in W7
In the final Clinical Placement 12 (Subject MEDI72-503) all WBA are due end of W5

- 1. For assistance with Osler contact: osler@bond.edu.au
- 2. For assistance with WBA contact: Med-assessment@bond.edu.au
- 3. For full details of all WBA requirements, read the WBA booklet located on iLearn.

Formal educational sessions should be conducted every week throughout the clinical placement to reinforce and enhance student learning. These sessions may vary throughout the placement.

Students have multiple workplace-based assessments (WBA) to successfully complete as a requirement for progression in the Medical Program. Assessments are completed in Osler ePortfolio, a cloud-based mobile assessment technology.

The In-Training Assessment (ITA): This workplace-based assessment tool provides the opportunity for the clinical supervisor to comment the student global performance on that placement to date. The ITA is a summary evaluation of whether students have met the requirements of that placement at the time of completion for:

- Clinical knowledge
- Procedural skills
- Clinical History taking and physical examination skills
- Communication
 - Communication with children and families
 - Appropriate clinical handover using ISBAR
- Personal and professional behaviour
- Attendance on clinical placement

The ITA can be completed by the supervising Consultant or their delegate registrar, preferably after seeking opinion from the team about the student performance. The clinician who spends the most time observing the student, is the best person to complete this task. In ICU, nursing staff con complete the ITA if they are consistently observing the student in practice.

End-Placement ITA due WK7 is completed by the assigned supervising Consultant or their delegate registrar, after seeking opinion from the clinical team about the student performance throughout the placement as to whether the student is performing 'at expected level'. Students can fail for not meeting attendance requirements on Clinical Placement – if they are not present then they are not spending time with patients sufficient to demonstrate competency.

Due Wk6: Mini-CEX: Students are encouraged to participate in active learning by interacting with patients by conducting a history or physical examination and then engage in discussions with clinician supervisors, known as Mini-Clinical Examinations (Mini-CEX). During the clinical placement, students will be supervised by the consultant supervisor or their delegate which can be a range of clinicians in specialist training pathways in the medical team, Senior House Officer or higher. PGY 1 and 2 are not permitted to complete Mini-CEX.

Students are required to complete and evidence four (4) Mini-CEX

- o 4 x patient management plans
- In this situation, students take the patient history, conduct the examination, review their investigations – then integrate this information and share their recommended patient management plan with a clinical team member
- It may be possible to do this task one-on-one or in a group setting such as ward rounds, clinics, operating theatre, and patient-management meetings

Patient Management plans are an observed Mini-CEX that requires the student to take a history, conduct a physical examination and review investigations. The student then integrates these skills and has a verbal discussion with the observing supervisor on next best steps in patient management. This integrated clinical task reflects the higher level of clinical reasoning and synthesis required as they approach internship. Feedback provided in the WBA should align to that given to students at the time of the interaction. The Global score given relates to the students' ability to conduct this clinical skill relevant to their current level of learning:

Students are required to complete and evidence four (4) Mini-CEX at an entrustability rating Level 3:

- 1. Unable to complete the task and requires direct instruction and intervention from supervisor (Repeat task)
- 2. Performs the task with proactive supervisor input and intervention (Repeat task)
- 3. Performs the task competently with minimal supervisor input and intervention (clear Pass for med student)
- 4. Performs the task competently and independently with supervision nearby if required (Intern level Pass)

Ward Call

Students are required to complete in their final year one (1) Ward Call by graduation. Students will join the clinical team attending to a rapidly deteriorating/critically unwell patient. Students will observe the team in action and can offer to assist with clinical tasks which are within their scope of practice such as:

- 1. Write Notes about Clinical Assessment- doing an SBAR of the clinical interaction
- 2. Assist in the delivery of any basic airway care/recovery position/medication or fluid changes by nursing staff
- 3. Assist with performing ECG/monitoring of saturations/BP that might be done as part of the assessment- emphasising the clinical relevance of these observation to the given interaction
- 4. Conduct any procedures that might be done like IV, blood tests taken, urine tests
- 5. Look and detect and calculation of the clinical signs of deterioration that might indicate need for ICU/Reg review such as GCS and seizure type
- 6. Seek out opportunities to be involved in these types of clinical assessment
 - a. Fall in an elderly patient

- b. Assessing Chest pain on the ward
- c. Respiratory Assessment in the post-op patient

Procedural Skills and Clinical Tasks

Bond Medical Students are required to complete the following Procedural Skills and Clinical Tasks on patients by the completion of their Phase 2 to graduate. Ten skills are to be completed on patients under guided supervision whilst two clinical tasks and three theory modules support their skills development. A wide range of health professionals can evaluate their skills competency, including doctors, nurses, allied health, and hospital technicians.

#	Required Procedural Skills		
1	In-dwelling Catheter insertion		
2	Intravenous Cannulation		
3	Suturing – basic wound closure		
4	Intramuscular injection		
5	Subcutaneous injection		
6	Electrocardiograph acquisition		
7	Venesection		
8	Blood Culture Sampling		
9	Sterile handwash, gown, and glove		
10	Airway Management		
	Required Theory Modules		
11	Personal Protective Equipment		
12	Assessment of the ICU patient		
13	Pulse Oximetry		
Required Clinical Tasks			
14	Discharge Summary completed in EMR		
15	Ward Call		

Students choose the location and timing of when they are ready to conduct this skill for assessment.

They are encouraged to conduct the skill for learning multiple times prior to being assessed for evidence of their competency

Students are required to complete all 15 clinical tasks prior to graduation

Evaluation of student procedural skills performance is based on an Entrustability Rating Scale:

- 1. Unable to complete the task and requires direct instruction and intervention from supervisor (Repeat task)
- 2. Performs the task with proactive supervisor input and intervention (Repeat task)
- 3. Performs the task competently with minimal supervisor input and intervention (clear Pass for med student)
- 4. Performs the task competently and independently with supervision nearby if required (Intern level Pass)

In addition to WBA, MD students will conduct the following other assessments:

- -Four Competency Assessments: Ultrasound, ALS, Mental Health First Aid and WH Intimate Exam
- -MD OSCE during Wk7 of Clinical Placement 5 as a check on clinical skills competency
- -Five (5) written knowledge Open Book Progress Tests, one at the end of each semester to promote continuous development in their clinical knowledge
- -MD Project and Conference presentation

If you have any concerns regarding any aspect of student behaviour and/or performance, please contact the Medical Program Placement Team (0420 928 125 or MED-Placements@bond.edu.au) ASAP.

MD Program Outcomes PHASE 2 (YEAR 4 and 5)

MEDI71-401, 402 and 403 Core Clinical Practice A, B and C

MEDI72-501, 502 and 503 Extended Clinical Practice and Research, A, B and C

The Australian Medical Council's Graduate Outcome Statements are organised into four domains. Within this subject, the framework mapped to the learning outcomes are Science and Scholarship Domain (learning outcomes 1-3), Clinical Practice Domain (learning outcomes 4-11), Health and Society Domain (learning outcomes 12-15) and Professionalism and Leadership Domain (learning outcomes 16-21).

- 1. Science and Scholarship: The medical graduate as scientist and scholar (SS)
- 2. Clinical Practice: The medical graduate as practitioner (CP)
- 3. Health and Society: The medical graduate as a health advocate (HS)
- 4. Professionalism and Leadership: The medical graduate as a professional and leader (PL)

Program LOs 2024		Description On successful completion of this program the learner will be able to:	AMC 2012	AMC standards 2023
01	Y5SS01	Apply current medical and scientific knowledge to individual patients, populations andhealth systems.	1.1, 1.2, 1.3, 1.4	4.1, 4.2, 4.3, 4.4, CP 1.13, 1.24
02	Y5SS02	Apply evidence-based and environmentally sustainable healthcare practices in patient care and research methodology.	1.5, 1.6, 2.7	4.2, 4.3, 4.5, 4.6, CP 1.15, 1.16
03	Y5SS03	Apply project management and/or communication skills to complete an evidence basedand professionally focussed project including its dissemination.	1.1, 1.5, 1.6, 3.3 , 4.9	4.5, 4.6, HS 3.6,
04	Y5CP01	Demonstrate cognitive, technical and interpretive skills in undertaking an accurate, detailed system-focussed history from a range of patients within a variety of clinicalsettings.	2.1, 2.2	1.3, 1.2, 1.4, 1.6, 1.8,
05	Y5CP02	Perform an accurate and complete physical examination on any body system including amental state examination.	2.3	1.9
06	Y5CP03	Use knowledge of common conditions, the patient history and physical examination findings, and clinical data, to undertake clinical reasoning and formulate probable and differential diagnoses.	2.2, 2.3, 2.4, 2.7, 2.8, 2.10	1.10, 1.13, 1.16, 1.22,
07	Y5CP04	Recognise and assess deteriorating and critically unwell patients who require immediatecare and perform common emergency and life support procedures.	2.12	1.20, 1.21, 1.23
08	Y5CP05	Safely perform a range of common procedures.	2.6, 2.11, 2.14	1.1, 1.5, 1.6, 1.7, 1.11, 1.12, 1.14, 1.17, 1.18
09	Y5CP06	Safely prescribe by applying the principles of "quality use of medicines" in an environmentally sustainable way.	2.7, 2.11	1.11, 1.12, 1.16, 1.17, 1.18,
10	Y5CP07	Select and justify common investigations, with regard to the pathological basis of disease, utility, safety, cost-effectiveness, and sustainability, and interpret their results.	2.5, 3.7	1.11, 1.12, 1.15, 1.23, HS 3.7, 3.8 SS 4.1
11	Y5CP08	To marace an initial management plan in consultation with patients, family and	2.1, 2.7, 2.9, 2.13, 2.14, 2.15, 3.2, 3.4	1.1, 1.5, 1.6, 1.7, 1.11, 1.12, 1.16, 1.19, 1.23, 1.24, HS 3.2, 3.3

12	Y5HS01	Apply evidence from behavioural science and population health research, integrate prevention, early detection, health maintenance and chronic disease management intoclinical practice.	1.6, 2.10, 3.5	3.7, 3.8, CP1.4, 1.7, 1.22
13	Y5HS02	Recognise and critically reflect on the diversity of populations regarding health issues applicable to the relevant unique historical, social and cultural contexts in the clinical and community settings including First Nations peoples.	3.1, 3.2, 3.4, 3.5, 3.8, 3.9	3.10, 3.2, 3.3, 3.8, 3.5, 3.12, CP 1.7
14	Y5HS03	Recognise and understand the complex interactions between the healthcare systems and environment, as well as the doctor and patient, whilst reflecting on power and privilege, tounderstand the role of these to ensure a culturally responsive and safe working context.	2.1, 2.8, 3.4, 3.6, 3.7, 4.5	3.3, 3.9, 3.1, CP 1.2, 1.5, 1.11,
15	Y5HS04	Communicate successfully in all roles including health advocacy, education, assessment, appraisal and with the First Nations peoples.	2.1, 3.3, 3.4, 3.8, 4.9	3.6, 3.3, 3.5, CP 1.3, 1.4, 1.6,
16	Y5PL01	Contribute to teams providing care to patients according to "Good Medical Practice: A Code of Conduct for Doctors in Australia" and "Good Medical Practice: A Guide for Doctors in New Zealand"	4.1, 4.2, 4.3, 4.4, 4.5, 4.6, 4.7, 4.8, 4.9, 4.10	2.3, 2.5, 2.6, 2.8, 2.9, 2.11, 2.12, 2.13, 2.16, 2.17, 2.18
17	Y5PL02	Explain and apply the principles and concepts of medical ethics including physician virtueand the 'four principles' of autonomy, beneficence, non-maleficence and justice in the context of team-based patient care.	3.6, 4.1, 4.2, 4.3, 4.4, 4.6, 4.10	2.1, 2.2,2.3, 2.4, 2.9, 2.10, 2.15, 2.18 HS 3.9,
18	Y5PL03	Apply the legal responsibilities of a medical practitioner across a range of professional and personal contexts in the practice of team-based patient-care.	2.15, 4.1, 4.2, 4.3, 4.10	2.2, 2.15, 2.18, CP 1.19
19	Y5PL04	Evaluate the performance of self and others as self-regulated and effective members of a diverse healthcare team in the management of a case load, respecting the roles of all healthcare professionals within the clinical setting and community settings, demonstrating professional foundation and essential skills.	3.1, 4.1, 4.2, 4.6, 4.7, 4.8, 4.9	2.2, 2.5, 2.3, 2.6, 2.9, 2.11, 2.12, 2.13, 2.15, CP 1.5, 1.6, HS 3.10,
20	Y5PL05	Demonstrate, and role model for junior medical students, skills to support the planned andactive development of a career.	4.1, 4.2, 4.3, 4.8, 4.9	2.5, 2.2, 2.6, 2.11, 2.12, 2.13, 2.15, 2.16,
21	Y5PL06	Demonstrate, and role model for junior medical students, the active management of selfcare in a clinical environment as part of a clinical team managing patients.	4.1, 4.2, 4.5, 4.6, 4.7, 4.9	2.2, 2.3, 2.5, 2.7, 2.9, 2.13, 2.15, 2.16
