GENERAL INFORMATION

PROGRAM INFORMATION

This certificate program is designed to build on undergraduate studies in the health and related sciences to develop specialist knowledge, skills, and attitudes relating to human nutrition and health. Successful graduates from this certificate program are well-placed to progress to further studies via the Masters of Nutrition and Dietetic Practice to become qualified as a dietitian and receive full credit for subjects studied in this degree. This program is a useful pre-medical program for graduates with ambitions to enter post-graduate medical programs, as a pathway into postgraduate specialisation in nutrition, or for internationally educated dietitians requiring professional updates before applying for Australian qualification recognition.

SUBJECT INFORMATION

CC-63039		Graduate Certificate in Nutrition			
Version	2				
Total Subjects	4	Total Credit Points	40	Cricos Code	079257M
Structure					
<p>Assumed knowledge is the minimum level of knowledge of a subject area that students are assumed to have acquired through previous study. It is the responsibility of students to ensure they meet the assumed knowledge expectations of a specified subject. Students who do not possess this prior knowledge are strongly recommended against enrolling and do so at their own risk. No concessions will be made for students' lack of prior knowledge. Please check for all requirements on your subject outline prior to enrolment.</p>
